Dear Parents across the globe,

Once again, greetings everyone. The reason why you have received this letter is because it concerns the well being and safety of your child. With just me alone, it's technically impossible to protect all the children's lives. This is the reason why I will be needing your help. I hope we could have a good collaboration and resolve this issue about the road's safety together.

Have you ever wondered why there are always accidents happening on the roads? What could technically be the answers to all these problems? Before finding the solutions, I'd like to address the problems first. I want to remind everyone that people are neglecting the road issues and its laws. According to CDC, almost 3700 people are killed globally in crashes involving cars, motorcycles, ~~by~~ bicycles, trucks or pedestrians. The factors that lead to traffic accidents include; over speeding, ~~drat~~ drunken driving, distractions to drivers, red light jumping, avoiding safety gears like seat belts and helmets, non-adherence to lane driving and overtaking in a wrong manner. Everyone needs to travel around, it doesn't matter from home to school or home to work. Like mentioned before, the road is not always safe, not only do they worry about whether they reach the destination but they also have to worry about whether they're gonna be safe which is really burdensome and unfair for the innocent children. The probability of getting into an accident is high. Statistics have shown that, for every 1000 miles you drive, the chances of getting into an accident is 1 in 366.

To protect the youth, I as a superhero need these superpowers to protect the lives of the children on the road. The three powers include atmokinesis, superhuman strength, and time travelling.

1. Atmokinesis : It's the ability to control the weather. I find ^{this} ~~these~~ superpower effective because there are many incidents that happen because of the weather. There are many incidents that happened due to storms, flood, hurricanes, tsunamis that could all lead to a road disaster. Children are pretty careless/clueless and they probably don't know that these disasters are happening which may lead to them roaming around. To avoid further danger for the children, it's better if I could control the weather and stop all these natural disasters from happening.
2. Superhuman strength : When faced in a situation where a vehicle is about to hit the children, the superhuman strength could come in handy when faced in these kinds of situations. I don't about anyone but, if I was faced in such a situation where a car is about to hit another kid, the feeling about being so helpless will hurt me down my whole entire life. Another factor is about the busy constructions nearby the road. As my close relatives have faced this situation where the construction materials fall on them. Luckily, the injuries weren't that serious but what if it were serious? What would have happen to them? With superhuman strength, I will be able to save them from the incidents.
3. Time travelling : There are times when things don't certainly go as planned. For example, the Sewol ferry tragedy where the South Korean students went on a trip but later on, the ferry sank. Many innocent lives were lost, did they do anything wrong? They were just trying to have fun. If I had the ability to travel back in time, it would've been great. Those families of the victim won't have to go through all those traumas, the students won't lose their lives. Everyone would've been safe. If we could take it into consideration and implement it on the road these days where many accidents happen daily. Many young lives are going to waste, could you imagine them becoming someone that brings a positive impact to the world one day (becoming the president) but their lives were lost just like that. With the ability to travel back in time, I could save all those children with such a bright future ahead of them, to further live their lives to the fullest.

Now how are we gonna collaborate together? Like mentioned above, I can't fully solve all these road problems across the world, it's literally impossible.

1. Teach your kids about the negative outcomes of the road accidents, since they are still young, they can take in information easily.
2. Help spread news to everyone surrounding you. (this is not a small issue)
3. Check your engines properly first before travelling like what pilots always do with their aircrafts. (it's better to check now than be sorry later).
4. Don't break the laws. (laws are there to protect our safety)

Congratulations, you have reached the end of this letter, I hope it might somehow convince you all. Nevertheless, I wish everyone great health. Stay safe everyone.

~~That~~ Thank you for your time reading this letter.

Best regards;
Sandbee
